

VACANCY

Installation/Service Engineer: Full Time

We require a junior engineer to work as part of a team to install/service Exhaust Fume/Compressed Air and Lubrication Systems into vehicle workshops. You should be practically minded and use to using hand and power tools.

The work involves installing spiral wound ducting systems, aluminium compressed air pipe systems, galvanised steel pipe oil supply and waste oil systems. Experience and measuring, cutting, and threading steel pipe would be an advantage.

Working at height will be required, IPAF, PASMA, CSCS card holders would be an advantage, although training could be given.

The work does require staying away overnight on occasion in hotels paid for by the company.

Applicants should hold a current valid driving licence, live local to Halstead and be over 24years of age for insurance purposes.

Salary: Depending on experience. A company mobile phone shall be supplied. Daily lunch allowance when out on site.

Hours: 7:30am – 5pm Mon-Fri.

To apply, call Gary on 07740 718352. Or forward your CV to gary@durnbury.co.uk
